### **MTV renews Arqiva's uplinking of two transponders**

- **MTV renews uplink contract with Arqiva for two entire transponders providing distribution into Europe**

MTV has renewed its contract with Arqiva for the uplinking of two entire transponders. This provides distribution of MTV into Europe.

Malcolm Campbell, Commercial Director at Arqiva Satellite & Media, said: "MTV has a number of distribution services with Arqiva and we are delighted that they have once again renewed this uplink service with us. Arqiva provides dedicated fibre backhaul between MTV's facilities and our London Teleport where we uplink the two transponders."

Arqiva has the infrastructure and experience to help rights owners, programme makers and broadcasters to create and capture content, and to manage and deliver high quality television around the world. Through its international teleports, media centres and extensive satellite capacity Arqiva currently provides trusted management and delivery of over 400 standard and high definition TV channels worldwide.
