

NEWS ALERT

Date: 13 May 2010

Oxford transmitter incident – latest (6.00pm)

- **Fire on the Oxford mast at Beckley**
- **TV services affected**

A fire at the top of the Oxford TV mast this afternoon has resulted in all analogue and digital TV (except analogue Five) being off-air.

The fire is out and we will attempt to assess the damage this evening. Only then can we give an update on when services can be safely restored using reserve facilities. Arqiva is doing all it can to resolve the situation as quickly as possible and we ask viewers to bear with us.

We hope to provide a further update later this evening.
