Universal Networks International expands services with Arqiva

- **Universal Networks International place third channel with Arqiva, providing uplink services and Eurobird capacity for Hallmark UK onto BSkyB**

Arqiva is to provide Universal Networks International with uplink and Eurobird capacity for the Hallmark UK channel.

Malcolm Campbell, Commercial Director at Arqiva Satellite & Media, said: "This is the third channel we service directly for Universal Networks International and we are delighted that they have chosen to expand their services with us. We will provide backhaul from London's Chiswick Park using diverse fibre to two of our London POPs and then on to our Bedford Teleport. Here the channel is statistically multiplexed and uplinked onto Eurobird for the BSkyB platform."

Arqiva has the infrastructure and experience to help rights owners, programme makers and broadcasters to create and capture content, and to manage and deliver high quality television around the world. Arqiva currently provides trusted management and delivery of over 400 standard and high definition TV channels worldwide.
