Arqiva SNG services for Monaco Grand Prix

- **Arqiva provides KDDI with SNG and satellite services to distribute coverage of the Monaco Grand Prix to Fuji TV in Japan**

Arqiva has provided SNG and satellite services for the distribution of Formula 1 coverage for KDDI and their customer Fuji Television in Japan. Coverage of the Monaco Grand Prix was uplinked by Arqiva to leased capacity on IS903.

Malcolm Campbell, Commercial Director at Arqiva Satellite & Media, said: "We are thrilled to be working with KDDI supporting their services for Fuji Television. From Monday 10 May through to Sunday 16 May we uplinked the race, practice sessions and interviews from our SNG truck on site to leased satellite capacity. Our large fleet of SNG trucks are backed up by our international teleports and extensive satellite capacity, making it simple for broadcasters to bring live content to their audiences wherever they be."

Arqiva has the infrastructure and experience to help rights owners, programme makers and broadcasters to create and capture content, and to manage and deliver high quality television around the world. With a fleet of SNG trucks and over 100 earth stations at multiple teleports Arqiva regularly enables the managed global delivery of live and special events like major sports tournaments.
