Arqiva distributes Teletext to Freesat

- **Arqiva provides uplinking and Eurobird satellite capacity to distribute Teletext onto the UK Freesat platform**

Teletext is to take up satellite capacity on Arqiva's Eurobird transponder. This will see Arqiva uplink their data service directly to the UK Freesat platform.

Malcolm Campbell, Commercial Director at Arqiva Satellite & Media, said: "Arqiva has extensive transponder capacity on the Eurobird satellite and was delighted to distribute Teletext onto the Freesat platform. Arqiva distributes TV services to platforms all around the world, supported by our international teleports, global fibre connectivity and comprehensive broadcast services."

Arqiva provides trusted management and delivery of over 400 standard and high definition TV channels to over 30 international TV platforms. Arqiva has the infrastructure and experience to help rights owners, programme makers and broadcasters to create and capture content, and to manage and deliver high quality television around the world.
