Date: 31 August 2010

### **RTBF renews automated SNG truck contract with Arqiva**

- **Arqiva provides RTBF with SNG transmission services including allocated satellite space which allows RTBF to manage its own OU bookings**

Arqiva is to continue to provide Radio Télévision Belge de la communauté Française (RTBF), the state broadcaster for Belgium, with SNG transmission services. This includes allocated Arqiva satellite space segment which RTBF book and manage themselves through automated booking equipment installed by Arqiva.

Malcolm Campbell, Commercial Director at Arqiva Satellite & Media, said: "Having worked with RTBF for a number of years we are delighted that they have again chosen to commit to Arqiva's automated SNG service. This is specially designed to enable broadcasters like RTBF to take control of their Occasional Use requirements within a fully maintained and monitored system - providing flexibility with first-class Arqiva support. We very much look forward to continuing our work with this important state broadcaster."

Arqiva has the infrastructure and experience to help rights owners, programme makers and broadcasters to create and capture content, and to manage and deliver high quality television around the world. With a fleet of SNG trucks and over 100 earth stations at multiple teleports Arqiva regularly enables the managed global delivery of live and special events for major broadcasters.
