

Arqiva links up ING Wholesale Banking

Arqiva is providing ING Wholesale Banking with live broadcasting facilities on its dealing room floor in the Netherlands.

The new facility allows ING's network of researchers, analysts and economists "down the line" interview access with broadcasters across Europe. The first of its kind in the Netherlands, the fixed point camera will extend ING's network of cameras in London and Singapore.

Arqiva's solution includes a point-to-point circuit from ING in Amsterdam to Arqiva's London facilities hub, which in turn connects to BT Tower for onward distribution to broadcasters.

David van Eeghen at ING Wholesale Banking said, "We work in a fast-paced and rapidly changing business and it's important for us to be able to respond to developments in European stock markets and economies almost immediately. Arqiva's fixed-point solution means that we can talk to broadcasters and audiences within minutes by removing the need to bring in outside broadcasting facilities."
