

# Full-length digital cinema feature delivered via satellite

The 2008 Palme d'Or winner "Entre Les Murs" has been digitally delivered to one of France's largest cinema chains by Arqiva's Content Delivery Network.

Working in partnership with Arts Alliance Media, the award winning film was distributed to the Circuit George Raymond cinemas (CGR) via the Intelsat 905 satellite. Sent direct to the library server at CGR Cinema's megaplex site in Villenave d'Ornon, Bordeaux, France, the 216 GB file was transmitted and loaded onto the server without any operator intervention.

Rich Philips, Arts Alliance Media's head of technical operations, commented: "This important first for Arts Alliance Media has successfully established the capabilities of our Content Delivery Platform. Working closely with Arqiva and using their proven satellite expertise we have developed a viable satellite delivery platform for digital cinema content which offers tremendous potential for distributors and exhibitors."
