

Occasional Use: Special Events

Arqiva's Special Events team provide a comprehensive range of services which enable you to broadcast from anywhere in the world to audiences all around the globe. From major live events such as concerts, sports and shows to corporate presentations, business conferences and product releases.

Working with a dedicated single point of contact, Arqiva's team of experts can fully manage your entire broadcast chain from cameras and operators to SNG mobile uplinks and global satellite distribution. Our fleet of internationally based SNG trucks have complete connectivity to Arqiva's extensive global infrastructure including 10 international teleports, over 100 earth stations and a global terrestrial fibre network. This can distribute your live or recorded broadcast, in standard or high definition, to home users, businesses and the internet all around the world.

Our highly skilled and experienced coordinators are supported by a dedicated bookings office, Master Control Room and managed help desk - all manned 24/7 to ensure reliable delivery of comprehensive services for your special event broadcast.
