

Managed Services Covert Installations

Arqiva offers a Covert Radio System installation and maintenance service as part of its Managed Services portfolio.

We can test, recommend, procure, install and maintain your covert vehicle radio systems, allowing you to concentrate on policing, whilst we take care of your communications.

Together with contract management, third party management, a full repair/replace service and software upgrades we can include the installation and management of your covert vehicle fleet in your communications managed service.

Our regional service centres provide the expertise required to install, maintain and manage all of your covert vehicle fleet. In addition our vehicle installation centre of excellence provides guidance on best practice, health and safety and EMC observance ensuring a consistent and high quality approach for all installations.

Features

- Independent of equipment manufacturers
- Covert and semi-covert installations
- Flexibility on antenna, installation style, switch placement and locations
- Inductive loop technology
- Covert motorcycle installations
- 24/7 service

- Quality audits on all installations

Technology that's powerful, reliable ...and invisible

Wiring looms hidden in many different places – we work with manufacturers to ensure best practice

Choice of equipment types hidden from view

Choice of antennae

Fully suppressed power lines and audio lines hidden from view

Typical Installations

Arqiva's skilled engineers can support the following installations:

- Semi Covert – ideal for low level surveillance by the police forces and organisations such as HM Immigration and HM Revenue and Customs
- Full Covert – ideal for police covert requirements and other agencies who need hidden communications
- Full Enhanced Covert – Enhanced so that a brief search of the interior would not reveal a covert radio, making it suitable for in car interviews and similar applications
- Specialised Covert – ideal for one-off applications, including specialist vehicles, non standard cars with enhanced security, boats, armoured vehicles, ICCS vehicles and major incident vehicles
