

Audience behaviours are changing, giving rise to a mix of challenges. So at Arqiva, we're changing too.

Change is shaping your priorities...

Hybrid consumption – of linear, OTT and FAST services – is shaping priorities for broadcasters and platform operators around the world:

Control costs

Enhance reach

Grow revenue

Optimise user experience

Aggregate broadcast and OTT operations

Focus on sustainability

Why Arqiva?

We're at the heart of the broadcasting industry in the UK and internationally.

Trusted by broadcast and media brands across the globe

More than a century's experience of moving data and content securely, effectively and sustainably

Proven portfolio of broadcast infrastructure and solutions

24/7 management and monitoring for total reassurance

...and our solutions

Arqade makes cloud-based delivery of channels and live events simple, secure and cost-effective.

Arqplex, our headend-as-a-service, unifies broadcast and OTT content processing operations and increases speed-to-market.

Arqedge, our hybrid CDN, enables streaming platforms to deliver a broadcast-grade experience while controlling costs.

Arqads, our addressable advertising solutions, allows linear channels to compete for digital advertising budgets.
