

Environmental Sustainability Policy

We commit to:

- We commit to decarbonising our business to net zero target by 2040, with an interim target of 2031 for scopes 1 and 2.
- Meet, and where appropriate, exceed the requirements of environmental legislation and policies
- Identify our environmental risks, including climate change, and develop strategic and operational plans to mitigate them
- Protect the environment by ensuring the prevention of pollution, which is a key consideration in the design and refurbishment of all our assets
- Ensure our products and services are designed, operated and maintained to minimise the waste generated during their lifecycle; repurpose, reuse or recycle waste materials whenever economically feasible
- Seek ways to enhance the biodiversity of the areas where we work for the benefit of the environment and our local communities
- Ensure all colleagues have the training, skills, knowledge and resources necessary to help support the delivery of our environmental sustainability goals and ambitions
- Ensure that sustainable principles are embedded in all of our business processes and form part of the framework used for decision making
- Ensuring the continual improvement of our environmental performance, through the maintenance of our Environmental Management System in line with ISO 14001

Scope

Our Environmental Sustainability Policy applies to our colleagues and those who work on behalf of any Arqiva business.

“Arqiva plays a critical role in the everyday lives of millions of households. So it is important that we operate our business and deliver our services in a sustainable way, especially given the environmental challenges we face as a society. Everyone at Arqiva has a role to play individually and collectively. That is why we have set out a clear set of commitments to reduce our greenhouse gas emissions, preserve our natural resources and provide opportunities for biodiversity to flourish.”

Shuja Khan, CEO
